PRODUCT SUMMARY

Alpron

Daily Water Decontamination Agent

For dental units & medical devices with attached water bottles

REF 3184 · 1 L bottles · ARTG 226413

ALPRO-AU-SUM-ALPRON · Version 1.0 · Issue September 2026 · Next review October 2027

Daily water decontamination for bottle-fed systems.

Designed for the daily decontamination and ongoing maintenance of procedural water in dental units and other medical devices with an attached water bottle or canister.

Silver-ion free and highly material compatible, Alpron helps control microbial contamination while supporting clean, reliable waterlines. Its performance is supported by international equipment manufacturer endorsements and independent European university research.

Designed to work synergistically with Bilpron for an integrated approach to daily water management and protection during periods when water is not flowing.

Key features

- Daily decontamination of procedural water in attached bottle and canister systems
- Highly concentrated - a small amount prepares many litres of procedural water
- Helps reduce microbial load in water bottles, canisters and waterlines
- Helps prevent biofilm and algae regrowth
- Reduces limescale and mineral sedimentation
- Non-corrosive and free from silver nitrate, hydrogen peroxide and iodine
- Excellent material compatibility; approved by well-known equipment manufacturers
- Backed by independent university research
- Can be used undiluted as a stronger periodic decontamination step where more than day-to-day conditioning is required
