PRODUCT SUMMARY

MaxiWipes

Surfaces

REF 4612 · StarterSet: box + 250 dry wipes · REF 4613 · 4 × 250 refill · Regulated via the soaking solution

ALPRO-AU-SUM-MAXIWIPES · Version 1.0 · Issue October 2026 · Next review October 2027

Dry wipes for a compatible liquid.

Large, dry, lint-free non-woven wipes on a reel in the **MaxiWipes-Box** — soaked on site with **PlastiSept eco** or **IC-100** for the cleaning and disinfection of medical-device surfaces. One dry-wipe system for two chemistries.

The dry wipe has **no efficacy of its own** — the spectrum, contact time and Australian registration come from the solution it is soaked in: PlastiSept eco (ARTG 164389) or IC-100 (ARTG 238325). Always confirm the dry wipe is compatible with the chosen solution.

Key features

- One wipe system for two chemistries — PlastiSept eco (alcohol-free) or IC-100.
- Tear-proof non-woven "cotton touch" fabric, 50 g/m², with micro-pore technology for maximum uptake of the soaking solution.
- Large 17 × 26 cm wipes, 250 per box, ready 30 minutes after soaking.
- Soaked with PlastiSept eco: especially suited to alcohol-sensitive surfaces (treatment units, upholstery, head rests, suspension tables, acrylic glass).
- Carries no efficacy of its own — the spectrum, contact time and registration come from the solution it is soaked in.
