PRODUCT SUMMARY

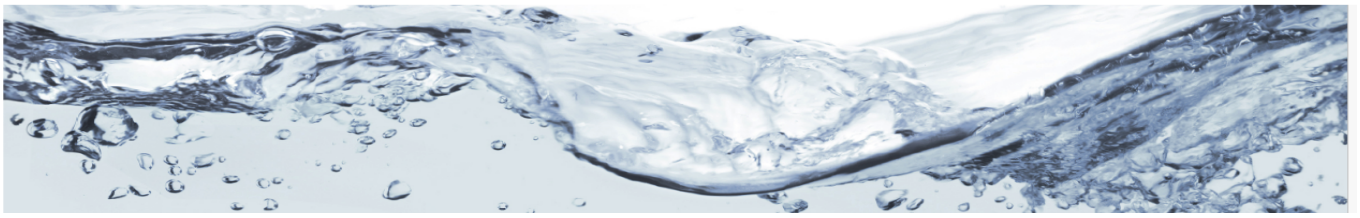

PlastiSept eco Wipes

Surface Cleaning and Disinfection of Medical Devices

Class IIb medical device solution - alcohol-free, ready to use

REF 4625 · 2 tubs + 2 refill bags · REF 4624 · 12 refill bags · ARTG 293206

ALPRO-AU-SUM-PLASTISEPT-ECO-WIPES · Version 1.2 · Updated October 2026

Alcohol-free cleaning and disinfection for sensitive medical-device surfaces

Purpose

PlastiSept eco wipes may be used for both pre-cleaning and disinfection, consistently with the ARTG-listed device and the manufacturer's intended use for cleaning and disinfecting medical-device surfaces. The wipes remove surface contamination while providing validated antimicrobial activity for subsequent disinfection. Use within the manufacturer's intended purpose and validated conditions is consistent with the existing ARTG registration.

Key features

- **Class IIb Medical Device / compliant medical-device disinfection.**
  Designed for professional cleaning and disinfection of medical devices and equipment, including dental units, X-ray equipment, small devices, suspension tables, milling units and other compatible non-critical medical-device surfaces.
- **Effective disinfection without harsh ingredients.**
  Formulated without aldehydes, alcohols, chlorine or phenols, providing effective disinfection while remaining a gentler choice for everyday use.
- **Highly compatible with sensitive materials.**
  Gentle on equipment; non-alcohol based to reduce the risk of cracking certain plastics; non-QAC based to help avoid corrosion on sensitive metals during prolonged contact.
- **Long endorsed, tested and recommended.**
  Recommended by leading dental equipment manufacturers for use on compatible medical-device surfaces.
- **Unique remanent effect.**
  Helps reduce microbial recontamination through residual antimicrobial activity after the treated surface has dried.
- **Large wipe size - 21 x 26 cm.**
  Generous dimensions provide greater surface coverage per wipe.
- **Viscose microfibre for excellent solution absorption.**
  Cotton-touch quality with strong liquid uptake and even distribution of the disinfectant solution.
- **More environmentally compatible wipe material.**
  Viscose fibre provides a more environmentally compatible option than many generic polyester wipes commonly available on the market.

Convenient ready-to-use wipe format

Combines PlastiSept eco's alcohol-free, material-compatible disinfectant chemistry with a large, highly absorbent viscose microfibre wipe for efficient coverage of medical-device surfaces.
